

This term we are looking at using the Earth within our art. Using the things in our surrounding to create painting's, prints and sculptures. The first people to use art were the Homo Neanderthals, or you might know them as Cave Men. Cave Men used the nature around them to create drawings that would tell a story.

Task

Research in Home Neanderthals art, find out what they would use as paint, and what it is they would paint/draw.

Create an information piece with information and pictures. Have a go at doing your own cave art.
